

## **Enrichment Services Report**

For the month of August, we have been looking for ways to safely reopen physical library services to the public through phased reopening. The health and safety of our staff and patrons is always at the forefront of our minds through this process. Up to this point, each branch has been offering curbside and drive-thru services to the public.

In addition to these services, we have been begun offering appointments, at which patrons can choose to schedule either a Computer or a Grab 'n' Go appointment. Both types of appointments last for 30 minutes, with up to two appointments per person, per day. Grab-n-Go includes browsing for library materials, faxing, and copying. One Grab 'n' Go appointment is limited to 5 patrons, and a Computer appointment is limited to 2. We are eager to expand our services to benefit the communities we serve. We are proud of our team and thankful for our library board for supporting us through this process.
